General Comment

As an author, I can say without a doubt that the "rights" of companies owning AI technology DO NOT supersede the rights of creatives - authors, artists, etc. AI should NOT have the "right" to be trained using copyrighted works without the express consent of the copyright owner. No human being on this planet is exempt from these laws, and to suggest that a computer program - and those that own it - CAN violate these same laws is not only laughable, but criminal. DO NOT allow AI companies to be above the law. DO NOT allow backdoor access to free use of copyrighted material. Presidential EO's are NOT the law, nor should something as inane as this become the law.
