General Comment

I do not believe Artificial Intelligence holds a place in the future of the US. AI steals from my livelihood as an American and profits off of theft. AI is overhyped and is fleecing the eyes of the American public.

AI must compensate people for copyrighted training data, and AI-generated materials must not be copyrightable. Furthermore, there need to be laws limiting human "replacement" with AI, when that involves just expecting the remaining humans to go overtime on cleaning up the slop produced.
