General Comment

Generative AI/LLMs have no place in a healthy future of the US workforce and are erroneously conflated with more legitimate forms of machine learning. Generative AI/LLMs are trained on outright theft of unlicensed copyrighted and non-consensually acquired creative materials and their output is, functionally, algorithmically-produced falsehoods not useful for worthwhile research and legally risky/ethically dubious to use in broad commercial creative works.

Restrictions on the works these models can be trained with should never be lifted and further, the existing models should be scrubbed due to the literal theft employed in their creation.
