As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-15cv-2jki
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7165

Comment on FR Doc # 2025-02305

Submitter Information

Name: Jonathan Doell

Email: [REDACTED]

General Comment

Artificial Intelligence has no place in governance due to its unreliability with the best AI being able to answer correctly only ~40% of the time and other AI models doing significantly worse.

AI is also showing in early testing to hurt the critical thinking abilities of those who leverage it frequently in place of actually doing work themselves. This has obvious negative effects for all of us down the line remaining competitive on the world stage.

Further, generative artificial intelligence only acts to harm our cultural output as it steals from people who actually create and leaves with just a degenerating copy of original material with randomizations done in an incomprehensible way due to machines having no comprehension of the human experience or even just living linearly through time.

It is unreliable, it steals, it hurts our ability to be competitive. It is also extremely wrongly labeled as there is no intelligence involved nor anything resembling critical thinking. It is a parrot that cannot even accurately repeat and a random number generator that occasionally suffers from innumeracy. It is a parlor trick of a solution in search for a problem that also hurts everyone who has to suffer its use.
