General Comment

In my reading this bill provides for significant new violations of copyright in order to further US AI growth. That tradeoff bill rates longstanding protections for content creators, putting their needs Secondary to imagined future growth of so-called AI technologies this is a terrible

Idea and I strongly urge against any such accommodations. These technologies companies should bear the reasonable burden of paying for the content that is so critical to their growth.

AI steals from my livelihood as an American and profits off of theft. AI is overhyped and is fleecing the eyes of the American public.
