General Comment

Giving OpenAI (and, likely, all AI companies) carte blanche to steal the creative work of human beings in the pursuit of commercial products intended to replace creative human efforts flies in the face of Art1 §8 c8 of the US Constitution.

It will stifle human artists while solely promoting the interests of big tech.

I firmly believe that we need a human centric copyright regime, likely one with a progressively increasing reregistration scheme, so that more works enter the public domain rather than becoming abandoned because they have no long tail.

But to preference IP theft by big tech over human artists is egregious.
