General Comment

I am a writer who believes that A.I Technologies such as ChatGPT and other software such as those will be more harmful than good. They will continue to steal the hard work of writers, artist, and others in different fields that require critical thinking. Instead A.I will continue to consume massive amounts of energy and water, putting our planet even more at risk. We will then have to create laws that would stop misinformation or fake imagery that already runs rampant. So I am asking that the government continues to run and operate as it has been without the need of A.I Technologies.
