Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7262

Comment on FR Doc # 2025-02305

Submitter Information

Name: Samuel W

General Comment

The function of copyright is to facilitate the creation of creative works by giving artists rights to control how their work is used or distributed. There are exceptions given for satire, journalism, critique, and whether it competes with the original work. If someone wants to use a work outside of these exceptions they can enter an agreement with the artist for payment or license. This is how IP has worked for over a century.

It is utterly absurd, unjust, and deleterious to the landscape of creative works to allow AI companies to copy this vast amount of data and then sell its product back into the same market to compete with the same works they stole from

AI training on copyrighted data must not be allowed, end of story.
