Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7307

Comment on FR Doc # 2025-02305

Submitter Information

Name: Marshall Sanborn

Address: United States,

General Comment

The current Large Language Models that are currently being sold as Artificial Intelligence are are a failed invention. These tools regularly makes errors and produce bad information, requiring an expert to edit anything made with the them. In their best use case, LLMs can only function as a clumsy, stupid assistant, performing only the most basic of tasks or awkwardly summarizing information while missing any context. Even if these tools were able to perform the tasks they are being sold for, the creation of LLMs requires using the intellectual property of human people. Without the consent of the people, LLMs can only work through the theft of intellectual property. Please do not prioritize the rights of machines over the rights of people. Please do not make theft legal.
