General Comment

I urge you not to destroy the law for smoke and mirrors. "AI" or large language models (LLMs) are an overhyped set of algorithms with limited utility. They are stealing from regular American workers, and the country will be much worse off as a result. For the security of all Americans, this technology should be regulated carefully, and companies that violated copyright in developing these models must be held to account. American workers have rights and the government needs to enforce them.
