

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-1dlk-zg8a
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7366

Comment on FR Doc # 2025-02305

Submitter Information

Name: Rachel Poulson

Email: [REDACTED]

General Comment

AI trained on data it does not own or have permission to use is theft, plain and simple. It is a parasite - it creates nothing new, gives incorrect answers 60% of the time, and is horrible for the environment.

AI as we currently know it is not true artificial intelligence. It is a series of scraping algorithms, which plagiarize and steal and produce something less than the sum of its parts.

AI doesn't have emotions, or critical thinking skills, or context. It can be easily led to extremes and lead others to extremes. There is no imagination, no creativity, and no actual effort involved in using it. Everything it produces is purely derivative. AI is incapable of innovation. AI needs to be clearly labeled as such and regulated heavily, and in some areas - including art, media, literature, etc - it needs to be banned outright.

The US government should not be spending money and resources developing AI, and it should absolutely be limiting AI's use in the private sector. AI is a dangerous waste of our country's money.
