General Comment

AI is not to be given a place in the future of the United States of America with free-reign over copyrighted material or any related acts. It should not be given free agency to steal from the livelihood of Americans and their craft in any capacity. AI is completely and utterly rubbish, deserving no special action or care in letting it take over in such a way. Any decent American, or heck, any decent PERSON should realize this, let alone companies. If you desire marketable or otherwise usable research or craft and materials, including art, design, music, etc..., you will not throw it away by doing anything to enable AI further, and INSTEAD invest in PEOPLE and their ability on their own.
