General Comment

AI using copyrighted works without proper attribution (mainly, financial compensation) to the author/publisher/actor/artist/owner in question, whether the works utilized in question be voice talent, written works, images artistic or otherwise, film and animation, voicework, etc, DOES NOT QUALIFY AS FAIR USE. The background use of populating AI (that is, large language models and *not* true artificial intelligence) with these copyrighted works is neither transformative, nor educational, and is more often then not for the purposes of commercial usage.

Allowing AI companies to legally steal the hard work of artists/creators/publishers will be a overwhelming net negative for all individuals involved due to A) stifling all creative industries (whether that may be: videogame development, arts and photography, books, movies, and animation), B) promoting the open blatant theft of copyrighted works AND introducing a legal (and hypocritical!) loophole around copyrighted protection, and C) proliferate exceptionally low-quality works and media into the mass market, hurting the consumer, the creators (publisher and developer/writer/artist/actor), and the investors.

ABOVE AND BEYOND ALL ELSE, THE UTILIZATION OF AI AS A MEANS TO AN END TO CUT COSTS AND DESTROY ENTIRE CAREER FIELDS DOES *NOT* VALIDATE THE WORTH OF ANY FORM OF GAINS, FINANCIAL OR OTHERWISE, THAT AI IS THEORIZED TO ENTAIL. WHATEVER BENEFITS THAT MAY COME WITH ALLOWING AI TO LEGALLY STEAL COPYRIGHTED WORKS CAN AND WILL BE OVERWHELMED BY THE NEGATIVE CONSEQUENCES.

THIS IS NOT THE CAN OF WORMS YOU WANT TO OPEN.
