General Comment

This is a terrible idea.

You could say that it is "progression", others might say it's not, but at the end of the day, the way that it reaches the result is through theft. Artists generally want their art to have copyright because it's THEIR art.

Have AI use them is downright disgusting. Imagine pouring a bunch of time into a piece, then someone steals it and uses it for themselves. "It's not stealing, it's inspiration!" No, it's not! Sure, I guess it's okay to give AI some techniques that other artists use, but just taking their art to process it? That is a violation of basic rights.

I understand that you want to progress in some way, but let me tell you, this "progression" will not be beneficial in the slightest.

All in all, allowing AI devs to bypass copyright laws is something that I, and I can also say with confidence, a LOT of people are not in support of.

This is like plagiarism, but changing it a little., like a school report. Unlike a school report, it doesn't affect anyone but the one who did it. But this...this WILL affect other people, so it's for the best that we do NOT allow AI devs to bypass copyright laws.

And in my personal opinion, allowing this is essentially disgusting and foul.
