General Comment

The Artificial Intelligence Action Plan's only value is to take away what those that create and give it to powers to use for their own purposes without restriction or compensation. It will destroy what little ownership people have to their ideas and even identities. Copyright has taken the form it has for a reason and allowing those that could easily pay the tithe to ignore it and take what they want anyway is unacceptable. Human innovation this claims to be helping generate is nonexistent and will only do the opposite. This should not be allowed to be given a stage or standing.
