General Comment

AI companies should not get any protection from copyright claims, or immunity for using material they have no paid fair market value for. AI companies damage the environment and suck up energy and contribute to climate disaster. It should be banned, or at worst strictly regulated

- * I do not believe AI holds a place in the future of the US
- * AI steals from my livelihood as an American and profits off of theft
- * AI is overhyped and is fleecing the eyes of the American public.
