General Comment

By opening the floodgates for artificial intelligence to "make art", you are begging to be given a lawsuit by every major corporation. They will fight for their copyright protections, losing you more money than it's worth implementing this.

Alongside that, the United States is known worldwide for exporting its media to other countries. Allowing for this is tantamount to giving that away in exchange for allowing a constant stream of slop nobody will watch. People prefer art that is made by people, not stolen by bots.
