

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-1gtz-jvdw
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7456

Comment on FR Doc # 2025-02305

Submitter Information

Name: Jeremy Moskowitz

Email: [REDACTED]

General Comment

As a fan of human art especially for film and TV, where performance has enduring, monetary value. (Reflected in the industry in the form of residual payments.) But if that performance can be ingested, analyzed, and recreated by AI without consent and without any compensation, many's livelihood is directly threatened. If cast in a role to play a chef, I can't go to the grocery store, clean the meat aisle out of prime rib, and say "Well I'm sorry but I'm a poor actor and I can't properly portray a chef if I don't train myself by cooking all these steaks." Similarly, if AI companies can't train their models without compensating and getting consent from the copyright holders, that's solely a failing of their business model. It's not the government's job to endorse or excuse theft - whether that theft is a grocery cart full of steaks or a copyrighted performance, script, picture, or other work of art.
