General Comment

Do NOT allow AI companies to willfully pilfer any content they deem useful to train their soulless products.

This is STEALING. As I understand it, stealing is illegal in the USA for very good reasons - but in particular, it hurts honest workers who are trying to make a living off what they provide. This applies not only to shopkeepers and other people selling tangible things, but also to creators of wonderful, inspired content - artists, musicians, writers, even programmers!

By giving AI companies the power to suck up whatever they like and spit out thoughtless garbage, it jeopardises the lives of real people who do real work. This isn't a new Industrial Revolution, this is straight-up theft, and this &^% techbro evangelism needs to be quashed NOW. It's already having a significant negative impact on REAL people, and it's only going to get much worse if this disgusting 'rob from the poor and give to the rich' policy is introduced.
