General Comment

Why should OpenAI get a free pass to scrape and use copyrighted materials as training data when in any other production process this is called theft? If some sort of remuneration and protections are not extended to those producing the training data, we will see the end of arts and culture as we know it. Good bye entry level positions in copywriting, graphic design, music production and so forth, positions that artists rely on when starting their careers. We need to find models to protect and empower those creating culture and this means not letting OpenAI take what they like from the internet without having to disclose this, honor copyright, adequately remunerate and credit artists. Regulate them. Protect the people who are actually making culture.
