General Comment

Artificial intelligence is a threat to human nature if taken too far. It has caused the media and arts industry to go through a huge employment problem with even the most talented of people having trouble finding work. Even I after graduation have not been able to find work within my field. Artificial Intelligence only steals from the hardworking people, there should be no reason why stealing work of others to feed this machine should be legal. Even so, it goes against the rights of the people who create the work that AI feeds off of.

I imagine that there will be plenty of lawsuits, not just from the individual, but companies as well.
