General Comment

I do not agree with the development of an AI action plan due to many reasons that are against what AI is. Such as:

* Holding AI in a place in the future of the US instead of the people themselves who trained in helping the federal government, including those that used to work in the federal government

* AI can steal livelihood as an American and profits off of theft, causing leeway of conglomerate companies take advantage to pass through copyright laws.

* AI is mostly used for recreational things and nothing more. Just a fad in the eyes of the American public.

Most of all, having AI be used for federal and government agencies are incredibly terrifying thought as there are inaccuracies that could cause errors and mistakes to the American systems.

I cannot support this development.
