General Comment

By implementing the legal use of AI, we deny millions of people around our nation the ability to work. Allowing this to step further will harm our nation irrevocably, both morally and physically. The use of generative AI has already been shown to be a hazard to our health and rapidly decreasing the amount of time between life and heat stroke of the known world. From a legal standpoint, all training material given to AI models to learn would be a breach of copyright, therefore garnering all models to be copyright infringement. Your people do not want this. You will not gain money from this. Stop.
