General Comment

This document is approved for public dissemination. The document contains no business-proprietary or confidential information. Document contents may be reused by the government in developing the AI Action Plan and associated documents without attribution.

AI Technology, such as it exists, in forms like OpenAI, Dall-E or Chat GPT are trained on the stolen materials of masses of writers, artists and other creatives. They constantly present false or otherwise harmful information as the truth endangering every day Americans. The technology is dangerously easy to abuse to spread false information about real world health, safety or political situations. In addition AI Technology consumes massive amounts of energy, water and natural resources endangering local infrastructure and the environment writ large. AI technology as it exists is dangerous, immoral, unethical and actively harmful to society and as a result should not be encouraged or subsidized in anyway by the American Government.
