General Comment

GenAI is a fraud perpetrated on the public. It depends utterly on stolen intellectual property and more energy than we can responsibly generate. It is called "AI" because that sounds good, but it is not artificial intelligence. It is an imprecise regurgitator of scraped content designed to impress and bamboozle. Ultimately, this hoax is intended to threaten and control labor.

If OpenAI is failing because it cannot steal copyrights, it should fail. This is transparently obvious. This is how our economy is supposed to work. Thieves are not given a pass because they stole successfully.

We see what is happening.
