General Comment

I work in the entertainment industry, which relies upon flourishing creativity, and reasonable compensation for creatives' work.

Such a policy would disincentivize creatives from sharing their best work. Why would any creative do so, knowing that an AI can illegally train on their copyrighted material and benefit from it financially , with little to no legal recourse available to them?

Why should AI companies be exempt from the same copyright laws that bind the rest of us? Why should an AI company be allowed to pirate copyrighted material and benefit financially from others' work, without those artists being properly compensated? It's theft, pure and simple.

This will destroy livelihoods and whole industries, and furthermore stifle creative innovation. It is incompatible with creativity in all forms.
