General Comment

This action plan will do nothing but derail the government from taking action against issues that matter. The action plan will allow greedy corporations to steal without consequence, steal from the people & the government.

This is an extreme violation of privacy, for individuals, small businesses, corporations, & the US government. It will not help 'secure AI dominance.'

I wholeheartedly do not support this plan; all it will secure is the idea that the common citizen does not have the right to own what they post online, that their privacy is worthless in the fruitless pursuit of the AI fad.
