As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-1oqz-7jwi
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7639
Comment on FR Doc # 2025-02305

Submitter Information

Name: Mary Shomon

[REDACTED]

General Comment

As the author of 15 books, I feel compelled to speak out against the unauthorized use of my work by AI companies. Let me be unequivocal: taking my content without my explicit permission or proper compensation is theft. It is a blatant violation of copyright law, which exists to protect creators like myself from exploitation and to ensure that intellectual property is respected.

When AI companies scrape, copy, or otherwise ingest my work without consent, they are not only undermining my livelihood but also eroding the very foundation of copyright law. If this practice is normalized, it sets a dangerous precedent—a “free-for-all” where anyone’s creative work can be taken and repurposed without accountability. Such a future would render copyright meaningless, stripping creators of their rights and disincentivizing the production of original works.

I urge AI companies to respect the intellectual property rights of authors, artists, and creators across all industries. If you want to use our work, ask for permission and negotiate fair terms. Anything less is unacceptable. And giving AI companies legal protection for theft is just more theft.

Let’s not allow technological progress to come at the expense of creativity and fairness. Protecting copyright isn’t just about safeguarding individual creators—it’s about preserving the integrity of art, literature, and innovation for generations to come.
