General Comment

OpenAI should not be allowed to train their models on copyrighted content without some sort of legal protections for the owners of said intellectual properties.

Allowing organizations, like OpenAI, to run amok will irreparably harm our society as a whole in a plethora of way. Perhaps irreparably. Legal ownership of intellectual properties will be undermined. Creative works would be rendered worthless or outright drowned out in a sea of AI generated content. This would effectively be cultural suicide unlike anything humanity has ever encountered before.

All brands, logos and characters/actors could be reproduced without permission, which in nefarious circumstances could be used to legally frame certain individuals or organizations for crimes they did not commit.

Something needs to be done before we reach that point of no return. When the very core pillars of our democracy are at stake here.
