General Comment

Artificial Intelligence is not just a "tool" as many would have us believe. It is nothing like a pencil, brush, camera, or musical instrument. It is a mimic, dependent upon the creations of others. Without a body of work to examine and extract, it has no ability to create anything.

That body of work is been fully and clearly protected by copyright law to protect the ability of its creators to enjoy the full financial benefit of their talent and hard work. AI is nothing more than open theft of that benefit.

Freeing AI of copyright regulations will not result in innovation. It will only mutate and distort the innovation that already exists, and commit fraud upon the innovators.
