General Comment

Having AI training on copyright material is wrong. This would cause not only identities to be skewed but it would businesses for many Americans. Many small businesses could lose potential because a machine prompt went in and stole their identity to a shady business. This same practice can also ruin a major business. Major businesses rely on artists and need to realize not everything can be made by a machine. You need artists to help design and write for them. AI shouldn't be replacing those who help create businesses.
