

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-1pfv-oms8
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7665
Comment on FR Doc # 2025-02305

Submitter Information

Name: Niki Hall
Email: [REDACTED]

General Comment

As an academic and professor the material private companies want free access to isn't free to those who create the knowledge nor is it free to those seeking a deep understanding of it. If private companies are allowed unfettered access to data then that access should be unfettered for all. But to be honest most people do not want generative AI. However, you know what type of AI I and others want the USA to be at the forefront of? Catching abnormalities in MRIs, PET, and CT scans. This type of AI doesn't generate or hallucinate anything. It has literally caught abnormalities earlier than a radiologist can. Let's have more of that if we insist on AI. No generative AI, no one wants it.
