General Comment

AI is an existential threat to thinking humans. Research has already shown that students who use AI lose other skills. This is terrible for everyone. AI is a "solution" in search of a problem. It's just nonsense that tech companies are trying to create interest in so they can sell it to other companies. It's trained on stolen data. It uses a vast amount of energy to create inferior results. This is repugnant. If AI has to exist at all it must be regulated.
