General Comment

As a professional creative, AI not only steals from the work of myself and my peers to power its generative results but directly threatens our livelihoods. It is an over-hyped solution looking for a problem at the cost to taxpayers and the workforce, for something that is harming the environment, America's highly talented creatives of all disciplines, and the critical thinking skills of all. AI proliferates misinformation as well as creative theft and should be highly regulated to prevent abuse by tech companies against the American workforce.
