General Comment

No one individual or thing should be completely immune from the legal process. If generative Ai is supposedly "beneficial" for the world, then why does it require legal immunity from the due process of law? If someone feels that their rights are being violated, they deserve to be able to take action. What kind of country is "for the people" when it actively works against the people by restricting what they can do to protect themselves and their property? If companies selling food were protected from lawsuits about food poisoning, then that leaves an open door for them to cause food poisoning without any punishment.
