General Comment

Strict guidelines must be maintained for the integrity and authenticity of any “AI” product. The repeal of the safe guidelines enacted by the Biden administration is a horrendous mistake, and in the opposite direction we need to head to maintain an ethical application of “AI.”

“AI” must NOT be trained on social media.

Companies developing “AI” must abide by copyright laws. The works of artists, authors, musicians, and all in the field of art and creation must be upheld and not abused. Companies in violation - by training “AI” models on any piece of work that they have not legally obtained, purchased rights to, or have been given consent to use, must be punished and fined for breaking those laws of protection.

If we abuse our artistic fellows, we will only eradicate their drive to create.

We must be conscientious, compassionate, respectful, and honest. Any “AI” trained in or with other manners or intentions will only be corrupted with poor data.
