General Comment

AI is not a technology worthy of supporting at the expense of long-standing U.S. copyright protections and laws.

It is difficult enough for artists in any medium to retain rights to their work in the digital age. To eliminate or weaken even one of the inadequate protections for artists and writers is bad enough and unjustifiable on its face. To seek to facilitate the extraction of creative work from its originator to enable another entity to profit from it is an even more illegitimate and destructive act. It's merely high-tech theft and grift, antithetical to creativity.

I oppose any effort to facilitate the reach of AI-enhanced technology as exemplified by OpenAI to exploit the work of others for private gain.
