

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-1ryu-wq3j
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7724

Comment on FR Doc # 2025-02305

Submitter Information

Name: Eric Pelesky

[REDACTED]

General Comment

AI companies should not be given legal precedent to steal creative, education, archival, or any forms of media. Many such businesses and their supporters have stated a desire to end the careers of artists, writers, researchers by compiling their carefully curated work into piles of randomly generated mush. The process of training AI is not critical of, educational towards, and does not parody the source material it uses, the machine has no sense of humor, it can not exaggerate, and it can not imitate, because such actions require a mind with which to display intent, which AI has none, it simply randomizes data to generate a specific outcome as closely as possible. To use other media for their own works, artist, journalist, and writers have to pay for the right to do so, and so should AI companies. There is no reason to give them carte blanche to do as they please to steal the hard work of others and feed it to a machine that will make worse art, generate incorrect information for people seeking answers, and make every system it touches worse, as we've already observed with companies like Google whose search engine gets worse and less useful by the day. Allowing this will only feed the bubble that will inevitably pop, and will ruin many more lives along the way. Don't. Do it.
