General Comment

Allowing Gen AI companies to scrape creative works of all kinds at will is a TERRIBLE idea. It would open up millions of expensive man-hours of unique work to be pillaged by total idiots and are putting a bullet in the head of a broad swathe of the US entertainment industry. The economic implications of this are dire and unacceptable. People must be able to trust that their hard work will be rewarded or they will have no motivation to work -- we will be trapped in AI slop hell forever.

Nothing gen ai creates is even CLOSE to real art. We must enforce our existing laws and protect real humans from the unlimited exploitation they are threatened by.
