## General Comment

I do not believe so called AI holds a place in the future of the US.

AI steals from my livelihood as an American and profits off of theft. I am a videographer and much of what I see is blatant plagiarism of content with no recourse for the originator.

AI is overhyped and is not liked by the majority of the American public, as is evidenced by the fact that companies like Apple keep delaying their AI features because they don't work. No use case has been shown that is not simply a way to not pay talented people for their work.
