Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7758

Comment on FR Doc # 2025-02305

Submitter Information

Name: Brennan Kessenich

Address:

General Comment

I am an artist whose life has been impacted by generative AI. When I teach embroidery, I constantly encounter students and beginners who have bought AI-generated patterns that do not actually work when they try to physically make the project. My partner is also an artist and has lost income because people are using generative AI instead of commissioning artists. Companies developing generative AI are also scraping material they don't have permission to use, essentially stealing the intellectual property of others in order to fuel a model that will in turn reduce income for the same artists they stole material from in the first place. Any AI regulations going forward must ensure ethical material acquisition and protect intellectual property. We must have options to opt-out of having our works used to make AI, and companies should not be allowed to make money off of using others' intellectual property.
