General Comment

I am deeply concerned about our over reliance of AI technology, especially with it being a threat to the security of the American privacy. Why does AI needs increasingly larger and larger amounts of information, stealing from artists, writers, and other jobs we need to support ourselves? Do we have right to keep our information secure from AI? I do not trust AI or any business, institution, company, or governing body that uses AI.

Furthermore, AI companies want to strip our copyright. This threatens thousands of creative and talented artists, authors, musicians, and the entire creative field. AI threatens my copyright of my art and creative skills. I want to use my art to support my career in Art. Do not let AI companies take that away.
