General Comment

AI could never exist without stealing the content its inventers have insisted they need unfettered access to in order to train AI algorithms. Those original content creators will never receive payment or restitution for their original work if the government allows AI to copy the original work of creators. This would be disgustingly un-American. If the creators of AI have no other choice but to use original work to train AI algorithms, they should pay royalties to the owner every of every piece of original work used to train the algorithm. If AI companies can't comply with the law, then they are running criminal enterprises and should be disbanded.
