

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-1vqg-ua7n
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7819

Comment on FR Doc # 2025-02305

Submitter Information

Name: William Aitken

[REDACTED]

General Comment

The use of large-scale AI systems shreds intellectual property rights of American citizens and companies. These systems steal from creators without any notice or compensation. Allowing these organizations to train their data models on privately owned photos, texts, and other ideas completely removes the incentive for American individuals and companies to produce new works.

Additionally, since the mass adoption of this technology within the past year, it has been proven that these systems are constantly factually inaccurate. It is a common sight for AI text to hallucinate wholly fictional and incorrect information and present it in a convincing way. There is no accountability for this misinformation.

Unless there are efforts made to curtail the companies that are stealing this information from American citizens and companies, the American people will suffer. We will see less reliable information, we will have more difficulty interacting with the systems we use daily, and we will be punished for creating written works, music, and pictures.

This is foolish to pursue.
