General Comment

I do not believe AI, specifically generative AI and large language models, hold any sort of place in the future of the USA. These sorts of "AI" steal from the livelihood of other Americans, and profits off of that theft. It is overhyped, much like the stock market in 1929. It is over-sanitized, and putting a fleece over the eyes of the American public. An aggregate of thousands of responses mashed together is guaranteed to be low quality. That's not what Americans deserve in their government and in their lives.
