General Comment

No, absolutely not! These A.I. companies must not be allowed to override copyright protections, allowing the to cause damage to the livelihoods of individual and businesses alike. The sole driving force behind this is profit wrapped up in the lie of some benefit to national security. All these A.I. systems is use already created content to Frankenstein together so unconvincing and fake "original" creation. In many cases you can even still see the signature of the original creator copied over to the A.I. creation. This dangerous trend must not be allowed to replace creatives and steal work that can be done by hardworking humans, watering down the overall creativeness of this country for the profit of a few billionaires.
