As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-1wp2-3jhh
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7839
Comment on FR Doc # 2025-02305

Submitter Information

Name: Cody Fernow

General Comment

No No No No No No No.

There are plenty of people who are going to be better at eloquence than I am. They're going to have Fancy technical jargon for all the reasons they don't want AI accessing their data or replacing human beings. They're going to explain in very specific terms why AI is bad in a world that's already in the grips of climate crisis due to the demanded places on are already overtaxed water supplies.

They're going to talk about how it's inefficient and mostly regurgitates are worst biases. How and people use it as a shortcut and when that happens real humans get hurt i.e. the student that has been suspended from Yale over an AI article that has been debunked.

They're going to give you more specific reasons pertaining to whatever the hell it is you want to do with this garbage idea and why it is a terrible idea.

You should maybe listen to them. That's what I do which is why I know any of this at all.

AI as well as the government need to keep their damn noses how to mine and everyone else's business. AI needs to stop being a convenient shortcut used to replace and harm people. AI has limited use and I recognize this. This is not an effective use of AI and I do not support it.

Those are all the fancy words I have. Personally, I don't know why the basic reasons aren't reason enough.
