General Comment

As an American citizen, I am concerned by the front running AI developers' lack of appreciation for the creators whose works are used in the training data on which their innovations rely on. The images, writings and other intellectual and creative productions are the result of creators practicing their crafts, which in turn, result in valuable intellectual properties that they profit from and earn their livelihoods, often by sharing publicly online. If AI developers continue to sample from artists, writers, etc., without proper crediting and compensation in accordance to copyright, then it is likely to result in the ceasing of sharing of such media online, leading to the same problem of no new data to further drive AI innovations.
