Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7845

Comment on FR Doc # 2025-02305

Submitter Information

Name: Elisabeth Tricou

Email: [REDACTED]

General Comment

AI is theft. Intellectual property and copyright should not be used as training data. To replace jobs and art with AI would destabilize the job market, and be used as an excuse to fire people. However, AI is not actual intelligence. It is a program that does not fundamentally understand what it is creating. It learns patterns, but can only reshuffle what it had been given.

Deregulating AI would also flood the market with art that would put artists in a place where creating anything new would not be something they could profit from. New art would grind and slow, until the AI would be, by and large, training off of AI art.

But perhaps most importantly artists should own what they create. And AI should not be able to violate that ownership.

Deregulating AI would be terrible for America, American culture, and American jobs.
