## General Comment

As an American citizen who has studied AI and Machine Learning, from linear regression to gradient descent, I do not believe AI will assist with national security, but will harm it. It has been demonstrated that it is quite possible to retrieve the training data from the AI (see <https://blog.gitguardian.com/yes-github-copilot-can-leak-secrets/> for an example). I worry that this rush to integrate AI nationwide will result in a half-baked technology that is easily exploited.
